

KR South Korea | Kyungdong University (KDU Global)

KDU Global's computing curriculum is centered on emerging technologies and high-employability skills. All courses listed are taught in **English**.

Program: B.Sc. in Smart Computing

- **Introduction to Artificial Intelligence (AI) * Description:** Covers the fundamentals of machine learning, neural networks, and problem-solving heuristics. Students explore how AI is applied in real-world automation and decision-making.
 - **Credits:** 3 Credit Hours (approx. 5-6 ECTS)
 - **Robotics and Automation**
 - **Description:** Focuses on the design, construction, and operation of robots. Includes study in sensor integration, motor control, and robotic programming for industrial and domestic use.
 - **Credits:** 3 Credit Hours
 - **Data Science & Analytics**
 - **Description:** Introduction to big data processing, statistical modeling, and data visualization. Students use tools like Python and R to extract insights from complex datasets.
 - **Credits:** 3 Credit Hours
 - **Cybersecurity Fundamentals**
 - **Description:** An overview of network security, cryptography, and risk management. Students learn to identify vulnerabilities and implement defense mechanisms against cyber threats.
 - **Credits:** 3 Credit Hours
 - **Internet of Things (IoT) Systems**
 - **Description:** Explores the architecture of connected devices. Topics include embedded systems, wireless communication protocols, and cloud integration for IoT.
 - **Credits:** 3 Credit Hours
-

MY Malaysia | Multimedia University (MMU)

MMU is highly regarded for its industry-aligned IT and Computer Science tracks, often featuring certifications from partners like Cisco and Huawei.

Program: Bachelor of Computer Science

- **Applied Artificial Intelligence**
 - **Description:** A practical approach to AI, focusing on building and deploying intelligent systems. This course often includes modules aligned with professional AI certifications.

- **Credits:** 4 Credit Hours
- **Security Technology & Ethical Hacking**
 - **Description:** Students take the role of security professionals to test system defenses. Covers penetration testing, footprinting, and incident response.
 - **Credits:** 3 Credit Hours
- **Machine Learning & Neural Networks**
 - **Description:** Deep dive into supervised and unsupervised learning. Students learn to build deep learning models and understand backpropagation and optimization.
 - **Credits:** 3 Credit Hours
- **Data Communications & Networking**
 - **Description:** Foundations of network architecture, OSI layers, and TCP/IP protocols. Includes hands-on lab work with Cisco-aligned networking hardware.
 - **Credits:** 3 Credit Hours

Program: Bachelor of Information Technology

- **Mobile Application Development**
 - **Description:** Teaching the full lifecycle of mobile app creation for Android and iOS, including UI/UX design and backend integration.
 - **Credits:** 4 Credit Hours
- **Blockchain & Distributed Ledger Technology**
 - **Description:** Principles of decentralized data, smart contracts, and the development of decentralized applications (DApps).
 - **Credits:** 3 Credit Hours

TR Turkey | Istanbul Aydın University (IAU)

IAU provides a robust engineering-based approach to computing, following the European Higher Education Area standards.

Program: Bachelor of Computer Engineering

- **Algorithms and Data Structures**
 - **Description:** The study of efficient data organization and algorithmic complexity. Focuses on sorting, searching, and graph theory.
 - **Credits:** 3 Credit Hours (6 ECTS)
- **Operating Systems Design**
 - **Description:** Core concepts of OS architecture, including process management, memory allocation, file systems, and concurrency.
 - **Credits:** 3 Credit Hours (5 ECTS)
- **Image Analysis & Computer Vision**
 - **Description:** Introduction to processing digital images to extract information. Includes pattern recognition and the use of computer vision libraries.

- **Credits:** 3 Credit Hours (6 ECTS)

Program: Management Information Systems (MIS)

- **Software Development Life Cycle (SDLC)**
 - **Description:** A management-focused look at software creation, covering Agile, Scrum, and Waterfall methodologies from planning to maintenance.
 - **Credits:** 3 Credit Hours (5 ECTS)
- **Data Mining for Business Intelligence**
 - **Description:** Techniques for searching large stores of data to discover patterns and trends that can drive business strategy.
 - **Credits:** 3 Credit Hours (5 ECTS)
